

VDG i-Controller Drum Motor Junction Box with Integrated (VFD)

The i-Controller features a **variable frequency drive (VFD) integrated** inside the motor junction box, provides conveyor drive data feedback and easily controls belt speed either remotely or directly at the drum motor. All VDG i-Controllers are matched to the performance of the electric motor.

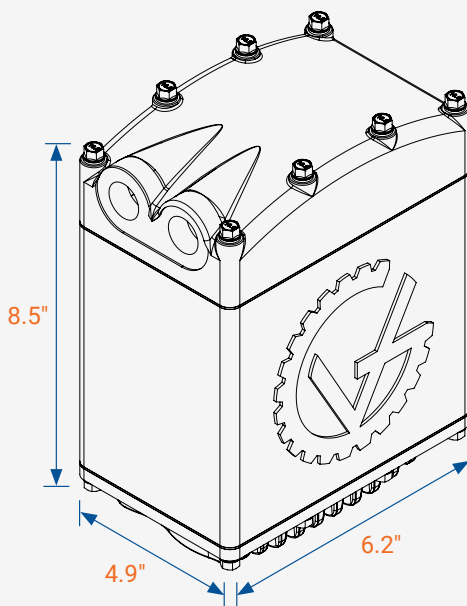

Available in two standard models;
i-C1 up to 1 hp and **i-C5 up to 5 hp**.

i-Controller Features:

- > Onboard Diagnostics
- > PLC Capability for Programming
- > EtherNet and MODBUS Ready for Communication
- > Frequency Output: 0-599 Hz
- > IP69K Enclosure Rating

i-C1
up to 1 hp

i-C5
up to 5 hp
